PASS POINT PLUS

READ ME FIRST!

It is important that the installer and user of PassPoint *Plus* be aware of the following items:

1. PassPoint *Plus* 2.0 should be installed and operated on a computer meeting or exceeding the following minimum requirements:

   - Pentium-II® 200 MHz
   - 32 megabytes RAM
   - 80MB free hard disk space
   - Windows 95, Windows 98, or Windows NT 4.0 (service Pack 3)
   - SVGA video display, 800 x 600 resolution, 256 color
   - Mouse
   - Configured printer for reporting

2. If installing PassPoint *Plus* on a computer system with network applications (such as WordPerfect™) that use the Borland Database Engine (BDE), you may experience difficulty if the computer system does not have write privileges to the network BDE directory.

3. It is a good practice to archive your events on a regular basis. Failure to do so may slow down browser operation.

4. Always close PassPoint *Plus* before shutting down your computer. Improper shutdown of your computer can cause the PC to experience shutdown problems, as well as possibly corrupting the PassPoint *Plus* database.
